

task

coud you verify the correct file path and also check if the file exists ina different location and also search for files matching GOALS.md in any of the directories

Ask

Based on my search, here's what I found:

****Search Results:****

-  ****`/root/.openclaw/workspace/GOALS.md`****
— Does not exist (the `/root/.openclaw/` directory itself doesn't exist)
-  ****No file named `GOALS.md`**** anywhere on the filesystem
-  ****No files matching `\*goals\*` or `\*GOALS\*`**** in any directory
-  ****No `.md` (markdown) files**** in `/app` or home directory

****Current Environment:****

- Working directory: `/app`
- Available files in `/app`: `gateway.py`, `harness.py`, `harnesses/` (directory), `requirements.txt`

****Conclusion:****

The `GOALS.md` file doesn't exist anywhere on this system. It may need to be:

- 1. ****Created**** — Would you like me to create it?
- 2. ****Located elsewhere**** — Is it in a different project or repository?
- 3. ****Part of future setup**** — Is this something you're planning to create?

Let me know how you'd like to proceed!
