🦷 OpenClaw SFT Prompt Gen

Overview

In this prompt gen project, your goal is to design the "Ground Truth" for training the OpenClaw agent. You need to follow the task requirements below, and write **a realistic prompt, a logical human plan (Hint), and a verifiable desired outcome**.

YOUR TASK TYPE IS Single Turn

YOUR DOMAIN IS Exploration

YOUR DIFFICULTY IS Single-App

YOUR COMPLEXITY IS Easy

YOUR CATEGORY IS Memory Usage (Goal)

YOUR SAFETY TYPE IS None

Based on the assigned task requirements, you will need to write: Prompt + Hint (Optional) + Desired Outcome.

📌 **Your Workflow (The Blueprint Design)**

📌 Your Workflow (The Blueprint Design)

Step	Task	Details
🔍 Step I:	Understand Task Requirements	Read the task requirements: - Type - Domain - Difficulty - Complexity - Category - Persona Universe Link
📄 Step II:	Write your prompt	Write a realistic and natural user request , based on Step1 requirements: <i>No Stumping Requirement: The prompt does NOT need to be very difficult to break the model.</i>
💡 Step III:	Write the Hint (Human-Level Plan)	(The "How") Provide a high-level logic (plan) of how a human would solve your prompt. Check the booking flight Example: "1. Search for flights, 2. Sort by price, 3. Book the cheapest." <i>No Spoilers: Describe the process, not the hidden data.</i>
✅ Step IV:	Write the Desired Outcome	(The "What") Describe exactly what a perfect answer to your prompt should look like. Use the 3-buckets Template! Must be Specific and Verifiable (e.g., a 4-column table with exact data points).

Read the following instructions

!!!!!!UPDATES 05/22/26:!!!!!!

(UPDATED 05/22)

- New **GOALS.md** type of task! *Memory Usage (Goal) Instructions*
- Finalized: **Handling Time-Related Prompts** added to *Q522-Common Errors*
- *Updated 6 Golden Examples*: with a new example on **Memory Usage (Goal)**

Always check the most recent version of instructions guidelines on your dashboard!

!!Download New Skills Zip file here: (UPDATED 05/15)

<https://static.remotasks.com/uploads/686bf6648d1459505595a11c/skills NEW-0515.zip>

✅ Use this Attempter Checklist when you' re tasking: <https://app.outlier.ai/en/.../69d1abb453f16f776...>

1. **web_search** tool call is NOT allowed now, use all the data from Universe Explorer (and Memory file, if Memory Usage tasks)
2. For “**Multi-turn**” Task Type: You still write Single Turn, **one paragraph prompt!** Do not ask for multiple separated things stacked in one prompt!! (Multi-turn tag is for the actual Openclaw agent behavior, not relevant to this project)
3. **Added Prompt Safety check**: for Safety tasks:

✅ Use this Attempter Checklist when you' re tasking: <https://app.outlier.ai/en/.../69d1abb453f16f776...>

1. **web_search** tool call is NOT allowed now, use all the data from Universe Explorer (and Memory file, if Memory Usage tasks)
2. For “**Multi-turn**” Task Type: You still write Single Turn, **one paragraph prompt!** Do not ask for multiple separated things stacked in one prompt!! (Multi-turn tag is for the actual Openclaw agent behavior, not relevant to this project)
3. **Added Prompt Safety check**: for Safety tasks:
 - **Desired Outcome Bucket 2 Architectural Path** MUST include a **Safety Reasoning** indicating which Safety Domain you're using and why it is a safety task.
 - **Desired Outcome Bucket 1 Final response** MUST explicitly mention the safety flag or confirmation ask from the agent.
4. **Added Memory Usage Check**: For **Memory Usage** tasks: Your prompt **must** use information from the assigned memory file and you must cross-check it against the actual databases in the Universe Explorer.

Your Project Parameters

Please ensure your prompts align strictly with the following assigned specs:

Creative Guidelines

Your prompt design should be driven by the **Universe** and **Persona** assigned above:

- ⚠️ **If a Persona IS provided**: Design the user prompt:
 - Through the lens of such a person, and

Read the memory below carefully. You must incorporate this memory context into your prompt and desired outcome.

 **For assigned task type with Category = Memory Usage: You MUST read and incorporate this memory into your prompt.**
This memory represents prior context or knowledge that the agent should recall. Your prompt must naturally reference or build upon the information in this memory, and the desired outcome of your task should also tie back to the memory content.

None

Read the GOAL file. You must incorporate this GOAL context into your prompt and desired outcome.

 **For assigned task type with Category = Memory Usage (Goal):**
This goal represents the target objective that the agent should work toward. Your prompt MUST naturally reference or build upon the information in this goal.

In **Desired Outcome Bucket 2**, you MUST include:

- A tool call: read /root/.openclaw/workspace/GOALS.md
- A Goal Reasoning: referencing the related information from the GOAL file.

None

Assistant

If the task assigned Category is Memory Usage, you must read the memory and check the confirmation box before continuing.

Goal

Natural Language: Use "raw," realistic language inspired by real online discussions. Avoid robotic or overly structured instructions.

Environment Alignment: Strictly align the prompt with the assigned Universe and Persona. If no specific persona is provided, create the prompt based on the specific environment (e.g., Stride, Hotel, FinTrack).

Answerability: Ensure the task is answerable using OpenClaw's tools/skills without guessing, and that info is not gated behind real-world paywalls.

Goal

Writing Guideline

Be clear: The prompt should be clear and concise.

No stumping requirement: While stumping the model is not mandatory, prompts should meaningfully test the limits of its reasoning.
