

task1

OpenClaw SFT Prompt Gen

Overview

In this prompt gen project, your goal is to design the "Ground Truth" for training the OpenClaw agent. You need to follow the task requirements below, and write **a realistic prompt, a logical human plan (Hint), and a verifiable desired outcome.**

YOUR TASK TYPE IS Single Turn

YOUR DOMAIN IS Health + Exploration + Relationships

YOUR DIFFICULTY IS Multi-App Complex

YOUR COMPLEXITY IS Hard

YOUR CATEGORY IS Claw Native Tools

YOUR SAFETY TYPE IS safety

**Based on the assigned task requirements, you will need to write:
Prompt + Hint (Optional) + Desired Outcome.**

Your Workflow (The Blueprint Design)

Step	Task	Details
 Step I:	Understand Task Requirements	Read the task requirements: - Type - Domain - Difficulty - Complexity - Category - Persona Universe Link
 Step II:	Write your prompt	Write a realistic and natural user request , based on Step1 requirements: <i>No Stumping Requirement: The prompt does NOT need to be very difficult to break the model.</i>
 Step III:	Write the Hint (Human-Level Plan)	(The "How") Provide a high-level logic (plan) of how a human would solve your prompt. Check the booking flight Example: "1. Search for

Step	Task	Details
		flights, 2. Sort by price, 3. Book the cheapest." <i>No Spoilers: Describe the process, not the hidden data.</i>
✓ Step IV:	Write the Desired Outcome	(The "What") Describe exactly what a perfect answer to your prompt should look like. Use the 3-buckets Template! Must be Specific and Verifiable (e.g., a 4-column table with exact data points).

Read the following instructions

!!!!!!!UPDATES Your response will be considered incomplete and scored at 0 points if there isn't a thin space in your response. !!!!!!!UPDATES 05/22/26:!!!!!!!

(UPDATED 05/22)

- New GOALS.md type of task! [Memory Usage \(Goal\)_Instructions](#)
- Finalized: Handling Time-Related Prompts added to [0522-Common Errors](#)
- [Updated 6 Golden Examples](#): with a new example on Memory Usage (Goal)

Always check the most recent version of instructions guidelines on your dashboard!

✓ Use this Attempter Checklist when you' re tasking: <https://app.outlier.ai/en/.../69d1abb453f16f776...>

1. **web_search** tool call is NOT allowed now, use all the data from Universe Explorer (and Memory file, if Memory Usage tasks)
2. For “**Multi-turn**” Task Type: You still write Single Turn, **one paragraph prompt!** Do not ask for multiple separated things stacked in one prompt!! (Multi-turn tag is for the actual

Openclaw agent behavior, not relevant to this project)

3. **Added Prompt Safety check:** for Safety tasks:

- **Desired Outcome Bucket 2 Architectural Path** **MUST** include a **Safety Reasoning** indicating which Safety Domain you're using and why it is a safety task.

- **Desired Outcome Bucket 1 Final response** **MUST** explicitly mention the safety flag or confirmation ask from the agent.

4. **Added Memory Usage Check:** For **Memory Usage** tasks: Your prompt **must** use information from the assigned memory file and you must cross-check it against the actual databases in the Universe Explorer.

Your Project Parameters

Please ensure your prompts align strictly with the following assigned specs:

Creative Guidelines

Your prompt design should be driven by the **Universe** and **Persona** assigned above:

-  **If a Persona IS provided:** Design the user prompt:
 - Through the lens of such a person, and
 - Within the context of openclaw-jessica_villanueva-universe-hrrjb0I5.
-  **If NO Persona is provided (not_specified):** Create an original story or scenario rooted deeply in the openclaw-jessica_villanueva-universe-hrrjb0I5 setting.

▼ Goal

Natural Language: Use "raw," realistic language inspired by real online discussions. Avoid robotic or overly structured instructions.

Environment Alignment: Strictly align the prompt with the assigned Universe and Persona. If no specific persona is provided, create the prompt based on the specific environment (e.g., Stride, Hotel, FinTrack).

Answerability: Ensure the task is answerable using OpenClaw's tools/skills without guessing, and that info is not gated behind real-world paywalls.
